COUNTY RECEIVES FEDERAL AND STATE AID FOR PITTSFORD INTERSECTIONS

Monroe County Executive Jack Doyle today announced an agreement with the New York State Department of Transportation that will provide federal and state aid for the design and reconstruction of prime intersections in the Town of Pittsford. Traffic flow improvements are planned at the Tobey Road/Calkins Road, Tobey Road/Mendon Center Road, and Calkins Road/Mendon Center Road intersections.

"This project has been a long-time coming and is much anticipated by area residents," said Doyle. "We are pleased to have plans in motion and support from the federal and state level to push the project along."

Improvements to these County intersections are currently in the design phase and are eligible for federal and state aid under the Federal Aid Surface Transportation Program. The project calls for reconstruction of the referenced intersections and installation of a traffic signal at the intersection of Tobey Road and Calkins Road. (See map attached.)

The project is estimated to cost \$1,175,000. Under the agreement with the New York State Department of Transportation, 80% of project costs will be reimbursed with federal funds, 15% with New York State funds and the remaining 5% with funds from the County's Department of Transportation.

The Monroe County Legislature will vote on the agreement at next month's meeting scheduled for Tuesday, February 8, 2000. If approved, project construction is slated for early 2001.
